INTERNATIONAL FUTURE FUELS WEEK 2027

BUILT TOGETHER, ONE FUTURE FUELS ECOSYSTEM

International Future Fuels Week (IFFW) 2027 will bring aviation, maritime and land transport together around a shared commercial reality: all three sectors are competing for the same constrained supply of future fuels feedstock and resources.

Built Together is the theme for this inaugural edition. The molecules already work, SAF, green methanol and biofuels. What's been missing is the forum where the people who scale them, feedstock producers, financiers, certification bodies, policymakers, and offtake buyers, actually meet. IFFW brings aviation, maritime and land transport together for the first time, on the belief that these sectors grow faster building the supply together than competing for it apart.

SINGAPORE IS THE HOME OF IFFW

IFFW is an official Singapore Exhibition and Convention Bureau event, supported by the Singapore Tourism Board.

Strategic position
At the crossroads of Asia-Pacific trade flows, connecting fuel producers, traders and end-users across the region.

Energy trading infrastructure
Home to a deep ecosystem of commodity traders, financial institutions and legal advisers focused on fuels and shipping.

Regulatory environment
A stable, rules-based jurisdiction with clear frameworks for sustainable finance and energy transition investments.

Low-carbon energy commitment
A firm national commitment to clear low-carbon targets, positioning Singapore as a credible hub for the energy transition.

INTERNATIONAL FUTURE FUELS WEEK 2027

WORLD'S LARGEST CROSS-SECTOR FUTURE FUELS CONFERENCE & TRADE SHOW

We bring together senior decision-makers to solve the commercial complexities of the global energy transition and diversification.

IFFW brings producers, buyers, investors, policymakers, technology providers, infrastructure operators and more together in Singapore for four days of commercial and technical discussion. Dedicated tracks for aviation, maritime, land transport, and off-road applications sit inside one integrated future fuels program. It is designed around the decisions that move lower-carbon fuels into use: policy and compliance, supply and demand, certification, infrastructure, project finance, contracting, and commercial deployment.

3,500+
Delegates & Trade visitors

150+
Industry speakers and senior decision makers

30+
Countries represented

4 DAYS
Multi-track conference

70+
Exhibitors from the entire ecosystem

Aviation

ICAO CORSIA, SAF mandates and targets, airport blending infrastructure and book-and-claim credit markets.

Maritime

Green methanol, bio-bunker and green ammonia supply, bunkering infrastructure & FuelEU compliance.

Land & off-road

Renewable diesel, ethanol, hydrogen and charging infrastructure for fleets and off-road equipment.

INTERNATIONAL FUTURE FUELS WEEK 2027

THE FUTURE FUELS ECOSYSTEM

Feedstocks

- Biomass & Agricultural Residues
- Waste & UCO
- Certification & Traceability
- Trading & Pricing
- Novel & Emerging Streams

Gas and hydrogen

- Ammonia
- Hydrogen
- Biogas
- Biomethane & bio-LNG
- Synthetic Gas

Liquid fuels

- SAF
- Methanol
- Ethanol
- Biodiesel
- Renewable Diesel
- Power to Liquids
- Lower Carbon Aviation Fuels (LCAF)

Infrastructure

- Engine Technologies
- Fuel Storage
- Port & Terminal Infrastructure
- Blending & Distribution
- Renewable Power
- Supply Chain & Logistics

Carbon

- Carbon Capture & Storage
- Direct Air Capture
- Carbon Intensity & LCA
- Carbon Markets & Pricing
- Mandates & Targets
- Carbon Credits & Certification

FUEL VALUE CHAIN

1. Feedstock Supply
2. Pre-Treatment
3. Conversion
4. Intermediate Products
5. Upgrading & Synthesis
6. Final Fuels
7. Distribution
8. End Use

FOUNDATIONAL BUILDING BLOCKS

- Technology & Innovation
- Finance & Investment
- Policy & Regulation
- Markets & Commercial
- Data & Digitalisation
- Talent & Capabilities
- Sustainability & Certification

OUTCOMES & IMPACT

Lower-Carbon Future
Reduced emissions & climate impact

Energy Security
Resilient, diverse energy systems

Scale & Impact
From pilots to bankable projects

Economic Growth
Jobs & sustainable investment

Global Collaboration
Partnerships for a just transition

INTERNATIONAL FUTURE FUELS WEEK 2027

WHY ATTEND

Future fuels for aviation, maritime and land transport are developed, financed and certified as though they constitute separate industries. In reality, all three draw on the same constrained pool of feedstock, capital and certification capacity, yet the majority of industry events continue to treat them as distinct markets with distinct audiences. IFFW addresses this directly. Four days bring the full value chain into a single consolidating venue.

- **A single market, addressed as one.** Aviation, maritime and land transport draw on the same constrained pool of feedstock, capital and certification capacity. IFFW is the forum in which that shared pool is allocated and coordinated, rather than contested separately across three disconnected markets.
- **Direct engagement with principal decision-makers**. Airline and shipowner chief executives, fleet operators, financiers, authorities, regulators and policymakers attend in person, enabling agreements to progress within a single meeting.
- **Access to partners outside one's own sector.** Counterparts in aviation, maritime or land transport, whoever sits in a different sector at most industry events, are present within the same venue.
- **A trade exhibition and co-located program aligned with the conference.** With zones spanning aviation, maritime, land and off-road, alongside co-located events held across the same four days, discussions held in session can be carried through to commercial engagement on the exhibition floor, within the same visit.
- **A position at the centre of the fastest-growing regional market**. Demand for future fuels, across aviation, maritime and land transport alike is increasing faster in Asia-Pacific than in any other region. Singapore offers direct access to this activity as it occurs.

INTERNATIONAL FUTURE FUELS WEEK 2027

4-DAY MULTI-TRACK CONFERENCE

DAY 1 — 14 JUNE — MONDAY - Ministerial & C-Suite Plenary

- Conference Opening & Welcome Remarks
- Keynote: Policy for Future Fuels in the Global Context
- A New Chapter in Biofuels
- Lunch & Networking in the Main Exhibition Hall
- Ethanol as a Multi-Vector Fuel
- Special Focus: Financing the Future Fuels Fleet
- Welcome Networking Reception

DAY 2 — 15 JUNE — TUESDAY - Policy, Regulation & Market Architecture

AVIATION STREAM	MARITIME STREAM	LAND STREAM
Aviation Stream: Welcome & Day 2 Framing	Maritime Stream: Welcome & Day 2 Framing	Land Transport Stream: Welcome & Day 2 Framing
CORSIA: What Airlines Actually Need to Do	IMO Targets and the CII Evolution	Renewable Fuel Mandates for Road: Asia's Regulatory Patchwork
ReFuelEU Aviation: Lessons and Implications for Asia-Pacific Carriers	Carbon Capture at Sea: A Practical Case	Green Public Procurement and Fleet Decarbonisation: Government as Market Maker
Aviation Carbon Markets: Book & Claim as a Pillar	FuelEU Maritime: What Asian Shipping Companies Must Prepare For	Carbon Pricing, Road Transport, and the Case for Fuel-Based Incentives
Passenger Perception: The Green Responsibility	Bio-LNG as a Transition Fuel for Asia	Off-Road: The Forgotten Frontier of Fuel Regulation
Aviation Fuel Strategies for Resilience	Green Shipping Corridors: From Political Commitment to Commercial Contract	HVO and Biomethane in Regulated Markets: Certification and the Risk of Mis-selling
SAF Blending Mandates: Who Pays, Who Benefits, and How Costs Are Passed Through	Bunker Fuel Regulation and Port State Control: Enforcement, Reporting, and the Data Gap	Total Vehicle Lifetime Emissions: a pragmatic approach
SAFc and Book-and-Claim in Aviation: Designing a Framework That Holds	The IMO Net Zero Framework: Fleet Ordering, Charter Terms, and the Transition Timeline	Rethinking the Role of Hydrogen in Net-Zero
National SAF Roadmaps in Asia-Pacific: Progress, Gaps, and the Case for Regional Coordination	Frameworks for Bio-Methanol Scaling	Balancing low-carbon fueled ICE and EVs

INTERNATIONAL FUTURE FUELS WEEK 2027

4-DAY MULTI-TRACK CONFERENCE

	AVIATION STREAM	MARITIME STREAM	LAND STREAM
DAY 2	An Airline CEO on Decarbonisation: Mandate, Cost, and the Passenger Equation	A Shipowner CEO on the Green Transition: Contracts, Costs, and the Charterer Relationship	A Fleet Operator on Alternative Fuels: Procurement Reality vs. Regulatory Ambition
	Day 2 Closing Remarks and Stream Summaries	Day 2 Closing Remarks and Stream Summaries	Day 2 Closing Remarks and Stream Summaries
DAY 3	**16 JUNE WEDNESDAY - Technology, Infrastructure & Scale-Up**		
	Aviation Stream: Welcome & Day 3 Framing	Maritime Stream: Welcome & Day 3 Framing	Land Transport Stream: Welcome & Day 3 Framing
	HEFA Today, AtJ and PtL Tomorrow	Green Methanol and Bio-LNG: Production Status and the Race to Bunkering Scale	HVO and Bioethanol at Scale: Feedstocks, Yields, and Supply Chain Bottlenecks
	Airport Fuelling Infrastructure: What Needs to Change and Who Will Pay for It	Port Bunkering Infrastructure for Future Fuels: Singapore and the Regional Network	Refuelling Networks for Road and Off-Road: Building the Distribution Infrastructure
	eSAF and Power-to-Liquid: Engineering Milestones, Cost Curves, and What 2035 Could Look Like	Vessel Retrofits and Dual-Fuel Technology: What Is Commercially Proven and What Is Not	Engine Adaptation and Vehicle Compatibility for HVO and Biomethane
	Digital Tools for SAF Traceability: Chain of Custody, MRV, and the Audit Trail	Green Corridor Projects in Practice: Singapore, Rotterdam, and the Numbers Behind the Headlines	Fleet Telematics and Fuel Management: Making the Data Case for Renewable Fuels
	A SAF Producer on the Road to Commercial Scale: What Has to Be True	A Port Authority on Building the Green Bunkering Hub: Investment, Risk, and the Long Game	An Energy Company on the Land Transport Transition: Where the Commercial Opportunity Really Is
	Day 3 Closing Remarks and Stream Summaries	Day 3 Closing Remarks and Stream Summaries	Day 3 Closing Remarks and Stream Summaries
DAY 4	**17 JUNE THURSDAY - Finance, Investment & Commercial Deployment**		
	Aviation Stream: Welcome & Day 4 Framing	Maritime Stream: Welcome & Day 4 Framing	Land Transport Stream: Welcome & Day 4 Framing
	Making SAF Projects Bankable: What Lenders and Equity Investors Actually Need	Financing the Green Fleet: Transition Loans, Green Bonds, and the Role of Export Credit	Infrastructure Investment for Renewable Fuel Distribution: Who Builds What and on What Terms
	Day 4 Closing Plenary: The Path to 2050	Day 4 Closing Plenary: The Path to 2050	Day 4 Closing Plenary: The Path to 2050

INTERNATIONAL FUTURE FUELS WEEK 2027

THE ROAD TO IFFW 2027

Since September 2026, **City Briefs** have brought together the people shaping future fuels markets in **Singapore**, **London** and **Houston.** The **Live Online** webinar series will deep-dive into each sector's latest regulatory, technical and market developments.

City Briefs

Live Online

- December 2026 **IFFW Global Maritime Brief**
- January 2027 **IFFW Global Aviation Brief**
- March 2027 **IFFW Global Land Brief**

INTERNATIONAL FUTURE FUELS WEEK 2027

IFFW 2027 DELEGATE PASS

Four days. All conference tracks. One delegate pass.

GENERAL DELEGATE

Founding	Super Early Bird	Early Bird	Regular
1,490 SGD	**1,990 SGD**	**2,490 SGD**	**2,990 SGD**
Before 30 November 2026	Before 31 January 2027	Before 31 March 2027	Standard rate

GROUP DISCOUNTS: **15% OFF** 3 passes | **20% OFF** 4 or more passes

YOUR PASS INCLUDES

- **Full conference access** — All four days and every sector track
- **Trade Show & Showcase** — Explore exhibitors and industry presentations
- **Welcome reception** — Evening of 14 June 2027
- **Lunch & refreshments** — Provided on conference days
- **Networking app** — Plan your agenda, connect and book 1:1 meetings
- **Attendance certificate** — Available upon request

COMPLIMENTARY PASSES

Buyer* | **Speaker** | **Public Sector** | **Media**

- Subject to credential verification; priority for senior experts and leaders.
- Maximum two registrations per organisation across all complimentary categories.

*Buyer Pass: Airlines, shipping lines, air cargo operators, and fleet owners only.

Additional Singapore GST (9%) applies to all rates

INTERNATIONAL FUTURE FUELS WEEK 2027

IFFW 2027 TRADE PASS

Three days on the expo floor at Marina Bay Sands with 70+ exhibitors, a live showcase stage, and free trade visitor access.

IFFW TRADE EXPO DAYS 1–3 14–16 JUNE 2027

- 70+ exhibitors over three days
- Zones: Aviation & SAF, Maritime, Land, Off-Road
- Where supply meets demand in future fuels

INDUSTRY SHOWCASE STAGE 10:30 – 17:00 DAILY

- 20-minute presentations including Q&A
- Launches, case studies, market data, live demos
- No conference pass required to attend

TRADE VISITORS FREE PASS REGISTER IN ADVANCE

- Free access to Trade and Showcase Stage
- Explore the latest technologies and innovations

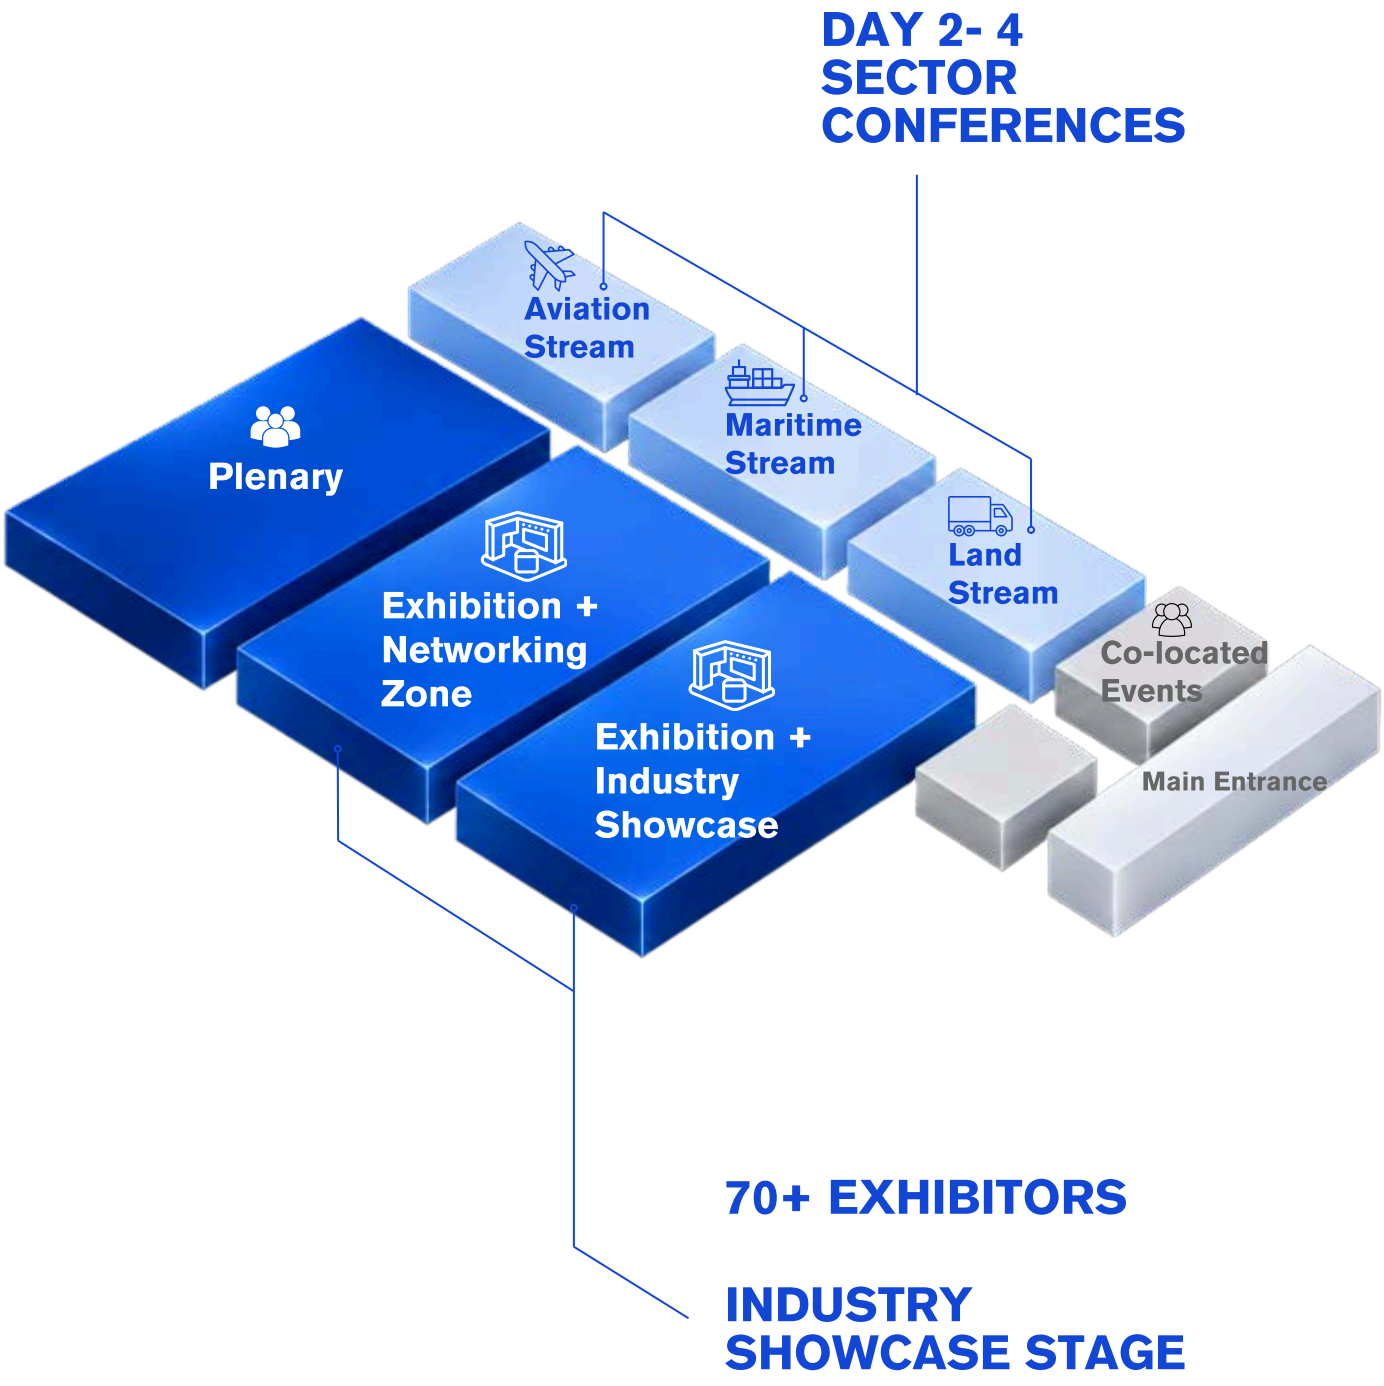

Complimentary **TRADE PASS**
