BUILT TOGETHER, ONE FUTURE FUELS ECOSYSTEM

International Future Fuels Week (IFFW) 2027 will bring aviation, maritime and land transport together around a shared commercial reality: all three sectors are competing for the same constrained supply of future fuels feedstock and resources.

Built Together is the theme for this inaugural edition. The molecules already work, SAF, green methanol and biofuels. What's been missing is the forum where the people who scale them, feedstock producers, financiers, certification bodies, policymakers, and offtake buyers, actually meet. IFFW brings aviation, maritime and land transport together for the first time, on the belief that these sectors grow faster building the supply together than competing for it apart.

SINGAPORE IS THE HOME OF IFFW

IFFW is an official Singapore Exhibition and Convention Bureau event, supported by the Singapore Tourism Board.

Strategic position

At the crossroads of Asia-Pacific trade flows, connecting fuel producers, traders and end-users across the region.

Energy trading infrastructure

Home to a deep ecosystem of commodity traders, financial institutions and legal advisers focused on fuels and shipping.

Regulatory environment

A stable, rules-based jurisdiction with clear frameworks for sustainable finance and energy transition investments.

Low-carbon energy commitment

A firm national commitment to clear low-carbon targets, positioning Singapore as a credible hub for the energy transition.

WORLD'S LARGEST CROSS-SECTOR FUTURE FUELS CONFERENCE & TRADE SHOW

We bring together senior decision-makers to solve the commercial complexities of the global energy transition and diversification.

IFFW brings producers, buyers, investors, policymakers, technology providers, infrastructure operators and more together in Singapore for four days of commercial and technical discussion. Dedicated tracks for aviation, maritime, land transport, and off-road applications sit inside one integrated future fuels program. It is designed around the decisions that move lower-carbon fuels into use: policy and compliance, supply and demand, certification, infrastructure, project finance, contracting, and commercial deployment.

3,500+

International participants

150+

Industry speakers and senior decision makers

30+

Countries represented

4 DAYS

Multi-track conference

70+

Exhibitors across a three day trade expo

Aviation

ICAO CORSIA, SAF mandates and targets, airport blending infrastructure and book-and-claim credit markets.

Maritime

Green methanol, bio-bunker and green ammonia supply, bunkering infrastructure & FuelEU compliance.

Land & off-road

Renewable diesel, ethanol, hydrogen and charging infrastructure for fleets and off-road equipment.

Feedstocks

Biomass & Agricultural Residues
Waste & UCO
Certification & Traceability
Trading & Pricing
Novel & Emerging Streams

Gas and hydrogen

Ammonia
Hydrogen
Biogas
Biomethane & bio-LNG
Synthetic Gas

Liquid fuels

SAF
Methanol
Ethanol
Biodiesel
Renewable Diesel
Power to Liquids
Lower Carbon Aviation Fuels (LCAF)

THE FUTURE FUELS ECOSYSTEM

Infrastructure

Engine Technologies
Fuel Storage
Port & Terminal Infrastructure
Blending & Distribution
Renewable Power
Supply Chain & Logistics

Carbon

Carbon Capture & Storage
Direct Air Capture
Carbon Intensity & LCA
Carbon Markets & Pricing
Mandates & Targets
Carbon Credits & Certification

FUEL VALUE CHAIN

FOUNDATIONAL BUILDING BLOCKS

Technology & Innovation	Finance & Investment	Policy & Regulation	Markets & Commercial
	Data & Digitalisation	Talent & Capabilities	Sustainability & Certification

OUTCOMES & IMPACT

Lower-Carbon Future

Reduced emissions & climate impact

Energy Security

Resilient, diverse energy systems

Economic Growth

Jobs & sustainable investment

Scale & Impact

From pilots to bankable projects

Global Collaboration

Partnerships for a just transition

WHY ATTEND

Future fuels for aviation, maritime and land transport are developed, financed and certified as though they constitute separate industries. In reality, all three draw on the same constrained pool of feedstock, capital and certification capacity, yet the majority of industry events continue to treat them as distinct markets with distinct audiences. IFFW addresses this directly. Four days bring the full value chain into a single consolidating venue.

- **A single market, addressed as one:** Aviation, maritime and land transport draw on the same constrained pool of feedstock, capital and certification capacity. IFFW is the forum in which that shared pool is allocated and coordinated, rather than contested separately across three disconnected markets.
- **Direct engagement with principal decision-makers.** Airline and shipowner chief executives, fleet operators, financiers, authorities, regulators and policymakers attend in person, enabling agreements to progress within a single meeting.
- **Access to partners outside one's own sector.** Counterparts in aviation, maritime or land transport, whoever sits in a different sector at most industry events, are present within the same venue.
- **A trade exhibition and co-located program aligned with the conference.** With zones spanning aviation, maritime, land and off-road, alongside co-located events held across the same four days, discussions held in session can be carried through to commercial engagement on the exhibition floor, within the same visit.
- **A position at the centre of the fastest-growing regional market.** Demand for future fuels, across aviation, maritime and land transport alike, is increasing faster in Asia-Pacific than in any other region. Singapore offers direct access to this activity as it occurs.

4-DAY MULTI-TRACK CONFERENCE

DAY 1

14 JUNE MONDAY - Ministerial & C-Suite Plenary

Conference Opening & Welcome Remarks

Keynote: Policy for Future Fuels in the Global Context

A New Chapter in Biofuels

Lunch & Networking in the Main Exhibition Hall

Ethanol as a Multi-Vector Fuel

Special Focus: Financing the Future Fuels Fleet

Welcome Networking Reception

DAY 2

15 JUNE TUESDAY - Policy, Regulation & Market Architecture

AVIATION STREAM

Aviation Stream: Welcome
& Day 2 Framing

CORSIA: What Airlines
Actually Need to Do

ReFuelEU Aviation:
Lessons and Implications
for Asia-Pacific Carriers

Aviation Carbon Markets:
Book & Claim as a Pillar

Passenger Perception: The
Green Responsibility

Aviation Fuel Strategies for
Resilience

SAF Blending Mandates:
Who Pays, Who Benefits,
and How Costs Are
Passed Through

SAFc and Book-and-
Claim in Aviation:
Designing a Framework
That Holds

National SAF Roadmaps
in Asia-Pacific: Progress,
Gaps, and the Case for
Regional Coordination

MARITIME STREAM

Maritime Stream: Welcome
& Day 2 Framing

IMO Targets and the CII
Evolution

Carbon Capture at Sea: A
Practical Case

FuelEU Maritime: What
Asian Shipping Companies
Must Prepare For

Bio-LNG as a Transition Fuel
for Asia

Green Shipping Corridors:
From Political Commitment
to Commercial Contract

Bunker Fuel Regulation and
Port State Control:
Enforcement, Reporting, and
the Data Gap

The IMO Net Zero
Framework: Fleet Ordering,
Charter Terms, and the
Transition Timeline

Frameworks for Bio-
Methanol Scaling

LAND STREAM

Land Transport Stream:
Welcome & Day 2 Framing

Renewable Fuel Mandates
for Road: Asia's Regulatory
Patchwork

Green Public Procurement
and Fleet Decarbonisation:
Government as Market
Maker

Carbon Pricing, Road
Transport, and the Case for
Fuel-Based Incentives

Off-Road: The Forgotten
Frontier of Fuel Regulation

HVO and Biomethane in
Regulated Markets:
Certification and the Risk
of Mis-selling

Total Vehicle Lifetime
Emissions: a pragmatic
approach

Rethinking the Role of
Hydrogen in Net-Zero

Balancing low-carbon fueled
ICE and EVs

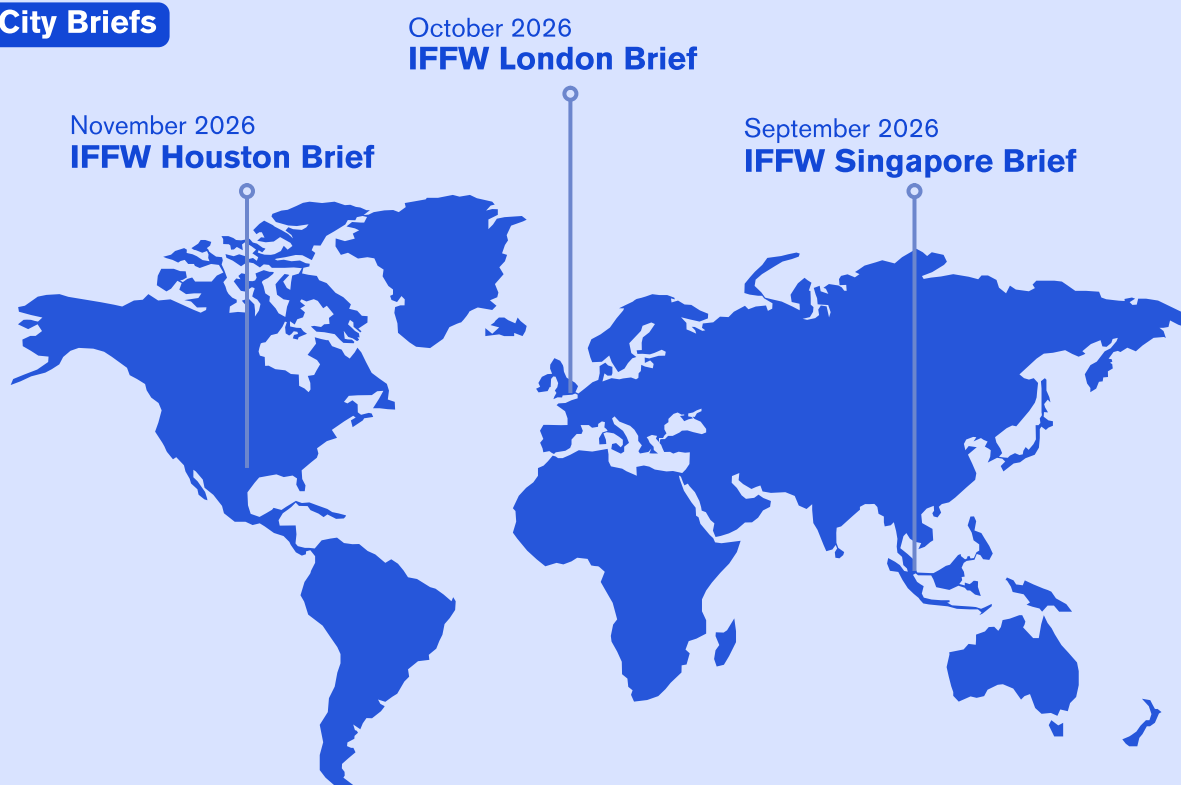

4-DAY MULTI-TRACK CONFERENCE

DAY 2	AVIATION STREAM	MARITIME STREAM	LAND STREAM
	An Airline CEO on Decarbonisation: Mandate, Cost, and the Passenger Equation Day 2 Closing Remarks and Stream Summaries	A Shipowner CEO on the Green Transition: Contracts, Costs, and the Charterer Relationship Day 2 Closing Remarks and Stream Summaries	A Fleet Operator on Alternative Fuels: Procurement Reality vs. Regulatory Ambition Day 2 Closing Remarks and Stream Summaries
DAY 3	16 JUNE WEDNESDAY - Technology, Infrastructure & Scale-Up		
	Aviation Stream: Welcome & Day 3 Framing HEFA Today, AtJ and PtL Tomorrow Airport Fuelling Infrastructure: What Needs to Change and Who Will Pay for It eSAF and Power-to-Liquid: Engineering Milestones, Cost Curves, and What 2035 Could Look Like Digital Tools for SAF Traceability: Chain of Custody, MRV, and the Audit Trail A SAF Producer on the Road to Commercial Scale: What Has to Be True Day 3 Closing Remarks and Stream Summaries	Maritime Stream: Welcome & Day 3 Framing Green Methanol and Bio-LNG: Production Status and the Race to Bunkering Scale Port Bunkering Infrastructure for Future Fuels: Singapore and the Regional Network Vessel Retrofits and Dual-Fuel Technology: What Is Commercially Proven and What Is Not Green Corridor Projects in Practice: Singapore, Rotterdam, and the Numbers Behind the Headlines A Port Authority on Building the Green Bunkering Hub: Investment, Risk, and the Long Game Day 3 Closing Remarks and Stream Summaries	Land Transport Stream: Welcome & Day 3 Framing HVO and Bioethanol at Scale: Feedstocks, Yields, and Supply Chain Bottlenecks Refuelling Networks for Road and Off-Road: Building the Distribution Infrastructure Engine Adaptation and Vehicle Compatibility for HVO and Biomethane Fleet Telematics and Fuel Management: Making the Data Case for Renewable Fuels An Energy Company on the Land Transport Transition: Where the Commercial Opportunity Really Is Day 3 Closing Remarks and Stream Summaries
DAY 4	17 JUNE THURSDAY - Finance, Investment & Commercial Deployment		
	Aviation Stream: Welcome & Day 4 Framing Making SAF Projects Bankable: What Lenders and Equity Investors Actually Need Day 4 Closing Plenary: The Path to 2050	Maritime Stream: Welcome & Day 4 Framing Financing the Green Fleet: Transition Loans, Green Bonds, and the Role of Export Credit Day 4 Closing Plenary: The Path to 2050	Land Transport Stream: Welcome & Day 4 Framing Infrastructure Investment for Renewable Fuel Distribution: Who Builds What and on What Terms Day 4 Closing Plenary: The Path to 2050

THE ROAD TO IFFW 2027

Since September 2026, **City Briefs** have brought together the people shaping future fuels markets in **Singapore**, **London** and **Houston**. The **Live Online** webinar series will deep-dive into each sector's latest regulatory, technical and market developments.

IFFW 2027 TRADE PASS

Three days on the expo floor at Marina Bay Sands — 70+ exhibitors, a live showcase stage, and free trade visitor access.

IFFW TRADE EXPO DAYS 1–3 14–16 JUNE 2027

- 70+ exhibitors over three days
- Zones: Aviation & SAF, Maritime, Land, Off-Road
- Where supply meets demand in future fuels

INDUSTRY SHOWCASE STAGE 10:30 – 17:00 DAILY

- 20-minute presentations including Q&A
- Launches, case studies, market data, live demos
- No conference pass required to attend

TRADE VISITORS FREE PASS REGISTER IN ADVANCE

- Free access to Trade and Showcase Stage
- Explore the latest technologies and innovations
